## Professional Experience

---

December 2015 — June 2016

Paris, France

LOCALIZATION ENGINEERING INTERN

Mozilla Corporation

I worked on several topics, including development of specific features to assist team quality assurance efforts, working with Release Management on l10n requests for Google Play and App Store pages, focusing on increasing Firefox Nightly localized builds usage, and mentoring new volunteers on Transvision project.

I also organized a localization event in Paris office, to gather the French localization community, onboard new volunteers, set goals and priorities, improve and share localization workflow.

*Project Management, PHP, Community Building*

July — September 2015

Mountain View, California

LOCALIZATION ENGINEERING INTERN

Mozilla Corporation

I worked on translation and quality assurance schedule for Firefox OS with Product, Quality Assurance, Engineering, and Business Development teams. I've been building thriving volunteer communities in Africa and lead localization workshops in Japan and Thailand with Asian volunteers. I learned a lot about community building, social skills, and cultural differences in meetings.

*Project Management, Conducting Meetings, Community Building*

April — August 2014

Mountain View, California

LOCALIZATION ENGINEERING INTERN

Mozilla Corporation

I helped ship software releases in 80+ languages to 300+ Million users and have been an interface between hundreds of employees and volunteers. My activities have consisted in proactively plan upcoming localization work and ensure all stakeholders were aligned, but also create and ship new features for localization tools to support decision-making activities and help manage translations.

*Project Management, PHP*

January — February 2014

Toulouse

DEVELOPER INTERN

PSV.COMTV

Worked in a startup to develop a fully localized mobile App using Web technologies and learned internationalization best practices.

*Project Management, JavaScript, internationalization*

2012 — 2014

Toulouse

FREELANCE DEVELOPER

PSV.COMTV

I developed a PHP back-end for a dynamic screen network that displays commercials.

*PHP, Customer Relationship*

## Volunteer work

---

2012 — Today

FRENCH LOCALIZATION LEAD

Mozilla

Managing the French-speaking volunteer localization team, encouraging participation and onboarding new members. I'm the author of the French translation of every Mozilla software and I make sure translations are consistent across products and websites. I'm also involved in translating marketing material — in-product & social media communications, web pages, etc. Pushing Mozilla's mission forward by making the Web more accessible to the world — that's what makes me happy.

*Working in a distributed team, Management, Project Management*

2012 — Today

TRANSVISION QA

Mozilla

Filing Transvision bugs, testing the app before each release. I also help making sure localizers needs are met when developing new features.

*Testing*

2011 — Today

FIREFOX CONTRIBUTOR

Mozilla

Filing and triaging bugs, providing input on localization issues. I wrote several patches for Firefox UI.

*JS, CSS, Bugzilla*

## Interests

---

- Online privacy protection — Speaker at several Free and Open Source Software events in France.
- Open Source Software advocacy — I participated in several events where I promoted open source solutions.

## Languages

---

- French — native speaker
- English — 15 years of practice in a scholar environment + 2 internships in California
